CHECK WITH IKE

1 Match the board and confirm dimensions, usable face and species.
2 Import the SVG or DXF at millimeter scale; check the lettering bounds above and its placement.
3 Review tooling, depth, workholding and machine post in CAM before a controlled cut.

Manual measurement review copy. Sightline reported 22.54 × 9.67 in; that camera scale is not used here.

No order, customer approval or machine program is included. CAM import and physical machining remain untested.
